The Fund Manager is responsible for the preparation and fair presentation of these financial statements in accordance with generally accepted accounting standards in the Kingdom of Saudi Arabia and for such internal control as the Fund Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Fund Manager has provided us with all the information and explanations that we require relating to our audit of these financial statements.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with generally accepted auditing standards in the Kingdom of Saudi Arabia. Those standards require that we comply with relevant ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal controls relevant to the Fund's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Fund Manager, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the financial statements taken as a whole present fairly, in all material respects, the financial position of the Fund as at 31 December 2012 and the results of its operations and cash flows for the year then ended in accordance with generally accepted accounting standards in the Kingdom of Saudi Arabia appropriate to the circumstances of the Fund.

The Fund's financial assets consist of bank balances and held to maturity investments and its financial liabilities consist of accrued expenses. Management believes that fair values of these instruments are not materially different from their carrying values.

The objective of the Funds is to safeguard the Fund's ability to continue as a going concern so that it can continue to provide optimum returns to its unit holders and to ensure reasonable safety to unit holders.

The Fund manages its investment portfolio and other assets by monitoring the return on net assets and makes adjustments to its investment policy in the light of changes in market conditions. The capital available is dependent upon the issuance and redemption of units.

Asset allocation is determined by the Fund Manager with a view for achieving the investment objectives.

The Fund maintains positions in different financial instruments as dictated by its investment policy. All investments are "held to maturity" investments. The Fund is exposed to credit risk, profit rates risk, liquidity risk and currency risk.

9. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

9.1 Credit risk

Credit risk is a risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

The Fund is exposed to credit risk on its cash and cash equivalents and investments held to maturity. The Fund Manager seeks to limit its credit risk by monitoring credit exposures, setting limits and dealing with individual counterparties with sound credit ratings.

The Fund's maximum exposure at the reporting date is represented by respective carrying amounts of the relevant financial assets in the balance sheet.

9.2 Profit rate risk

Profit rate risk arises from the possibility that changes in market profit rate will affect future returns or the fair value of the Murabaha contracts.

The Financial assets of the Fund are not exposed to profit rate risk as murabaha investments are held to maturity and are entered for short term at fixed rates of profit.

9.3 Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in releasing funds to meet commitments associated with financial liabilities and payment towards units redeemed. Liquidity risk may result from the inability to sell a financial asset quickly at an amount close to its fair value.

The Fund's terms and conditions provide for the subscription and redemption of units on every valuation day and it is, therefore, exposed to the liquidity risk of meeting redemptions at any time. The Fund's securities are considered to be readily realisable and they can be liquidated at any time. However, the Fund Manager has established certain liquidity guidelines for the Fund and monitors liquidity requirements on a regular basis to ensure sufficient funds are available to meet any commitments as they arise.

9.4 Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to a change in foreign exchange rates. All the financial instruments of the Fund are denominated in Saudi Riyals and hence, the Fund not exposed to currency risk.

The last valuation date of the year was 31 December 2012 (2011: 31 December 2011).
